Invensys Operations Management Introduces New Website

JANUARY 21, 2010/PLANO, TEXAS – [Invensys Operations Management](#), a global provider of technology systems, software solutions and consulting services to the process and manufacturing industries, today announced the launch of a new corporate website. The new site shows how the company's premier industry brands and solutions offer the most holistic, cost-effective way to optimise and improve the performance and profitability of its clients' business operations.

"Over the past several months, we have made significant investments to create a customer- and visitor-friendly site that supports our open, collaborative approach," said Mark Davidson, vice president, global marketing, Invensys Operations Management. "As a truly integrated company, the combined capabilities of our eight leading brands, including Avantis®, Eurotherm®, Foxboro®, IMServ™, InFusion™, SimSci-Esscor™, Triconex® and Wonderware®, are aligned for our clients' long-term success, and the new website has been designed for easy access to information about our unique industry solutions, services and products offerings.

"With more enhancements to come, this is only Phase 1 of our new online presence, but we are pleased to offer a look at the value Invensys Operations Management provides to our clients and the market in general. With an open environment and platform, we help improve the performance of our clients' resources—their people, equipment, energy and materials—in real time, with dramatic, measurable results. Our new site demonstrates that when working with Invensys, the experience will be one of real collaboration with real-time results."

Located at jom.invensys.com, the website features an integrated view of Invensys Operations Management, with sections devoted to specific industries, solutions, products, and consulting and service offerings, along with customer and ecosystem partner support and training. The site is also home to 60 new customer success stories,

as well as additional information on how the company's collaborative approach benefits executives, managers, IT professionals, engineers and maintenance personnel.

About Invensys Operations Management

Invensys Operations Management, a division of Invensys, is a leading provider of automation and information technology, systems, software solutions, services and consulting to the global manufacturing and infrastructure industries. Headquartered in Plano, Texas, its solutions are used by more than 40,000 clients around the world in more than 200,000 plants and facilities.

Invensys Operations Management's offerings are delivered under several prominent industry brands, including Action Instruments, ArchestrA, Avantis, Barber-Colman, Chessell, Continental, Eurotherm, Foxboro, IMServ, InFusion, SimSci-Esscor, Triconex and Wonderware. The company's approximately 9,000 employees and its global partner ecosystem integrate these products and services to help clients collaborate across systems and enterprises in real time, extracting critical data to make faster, better decisions and synchronize their operations from the plant floor to the executive offices, aligning production goals with business objectives.
