## Wonderware Mobile Solution from Invensys Awarded Motorola Enterprise Mobility Validation

MARCH 02, 2010/PLANO, TX – [Invensys Operations Management](#), a global provider of technology systems and software solutions to process and manufacturing industries, today announced that its [Wonderware IntelaTrac™](#) mobile solution has achieved Enterprise Mobility validation through [Motorola's Enterprise Mobility Validated Solution Program](#). The IntelaTrac solution is a mobile workforce and decision support system. Featuring configurable software and ruggedized mobile hardware, it enables better workflow, procedural and general task management focused on plant operations, maintenance management, production tracking and compliance applications.

The mobile component of the IntelaTrac application can operate with a wide variety of hardware from Motorola, which is available through the Wonderware brand as a part of a customer's purchase of the system. These products include the [MC55 and MC70 Enterprise Digital Assistants](#) (EDA) and MC9090 family of mobile computers.

"Being awarded the Motorola Enterprise Mobility Validation is a significant achievement because it assures Invensys customers and partners of system interoperability between Motorola devices and our IntelaTrac applications," said Jim Frider, mobile solutions marketing manager, Invensys Operations Management. "This will lead to faster solution deployment, lower cost of ownership and higher end-user satisfaction. There's no doubt that our success has been greatly accelerated due to our relationship with Motorola, which has helped us deliver the mobility solutions our customers are demanding."

Motorola's Enterprise Mobility Validated Solutions Program enables partners to test and validate their mobility solutions on Motorola products to help ensure interoperability and meet the application-specific needs of customers, as well as reduce risk and time to deployment. Invensys Operations Management successfully

achieved Enterprise Mobility validation by completing Motorola's Enterprise Mobility Validated Solution Program, including joint testing at the Motorola Solution Center located in Holtsville, New York. The IntelaTrac solution is now permitted to use the Motorola Enterprise Mobility Validated™ Software logo, designation which will help assure customers and partners of system interoperability between Motorola devices and IntelaTrac applications.

### **About Invensys Operations Management**

Invensys Operations Management, a division of Invensys, is a leading provider of automation and information technology, systems, software solutions, services and consulting to the global manufacturing and infrastructure industries. Headquartered in Plano, Texas, its solutions are used by more than 40,000 clients around the world in more than 200,000 plants and facilities.

Invensys Operations Management's offerings are delivered under several prominent industry brands, including Avantis, Eurotherm, Foxboro, IMServ, InFusion, SimSci-Esscor, Triconex and Wonderware. The company's approximately 9,000 employees and its global partner ecosystem integrate these products and services to help clients collaborate across systems and enterprises in real time, extracting critical data to make faster, better decisions and synchronize their operations from the plant floor to the executive offices, aligning production goals with business objectives.
