Spectrum and Hamilton Group join forces to develop 2D Multi-Client surveys offshore South America

Seismic services provider Spectrum and Hamilton Group's E&P Technology Group (EPTG) are planning 2D Multi-Client surveys and basin analyses offshore South America combining Spectrum's multi-client survey expertise with basin analyses conducted by the Hamilton EPTG team, headed by Michael Hiner.

Charles Harmer, Spectrum's Executive Vice President of Multi-Client Services, stated: "Hamilton's basin analysis expertise, especially in offshore basins, will help ensure that we have the most effective data for our clients, giving them the ability to accelerate their interpretation by utilizing Hamilton's basin studies."

Keith Grimes, Hamilton Group CEO said: "Aligning our E&P Technology Group with strong technical partners is a primary initiative within our company in 2010 and we are proud to be affiliated with Spectrum."

For more information, please contact Spectrum at mc-us@spectrumasa.com or 1.281.647.0602.

About Spectrum

Spectrum provides seismic data processing, Multi-Client surveys and offshore seismic data acquisition services to the global oil and gas industry from offices in UK, US, China, Egypt and Singapore.

Spectrum offers 2D and 3D, land and marine seismic data processing in both depth and time.

All statements in this press release other than statements of historical fact are forward-looking statements and are subject to a number of risks, uncertainties and assumptions that are difficult to predict and are based on assumptions as to future events that may not prove accurate.
