Invensys Operations Management Receives CSIA “2010 Partner of the Year” Award

JUNE 01, 2010/PLANO, TEXAS - Invensys Operations Management, a global provider of technology systems, software solutions and consulting services to the manufacturing and infrastructure operations industries, today announced that it has received the Control Systems Integrator Association (CSIA) 2010 “Partner of the Year” award, recognizing the company’s contributions and support of the CSIA’s programs.

The CSIA provides its member companies with the means to improve their business and executive management skills in support of excellence as a system integrator. This award recognizes that Invensys Operations Management has significantly contributed to the betterment of CSIA and its members, as well as promoted CSIA certification.

"The 2010 Partner of the Year award from the CSIA recognizes Invensys Operations Management's achievement in consistently supporting and advancing our overall goal to enhance the business expertise of our system integrator membership, as well as recognizing and promoting the CSIA-certified brand," said Bob Lowe, CSIA executive director. "With the support of companies like Invensys, CSIA is able to provide industry-leading business development skills for our integrator members via best practices, and in doing so provide a healthy, low-risk channel for clients to achieve operational excellence through the application of Invensys Operations Management technology."

CSIA's overall goal is to raise the bar among the systems integrator communication by enhancing the business expertise of its members. The organization assists integration firms of all sizes, engineering specialties, product experience and industry knowledge to share their collective business expertise to help address common business issues.

“Being awarded the CSIA 2010 Partner of the Year is a significant achievement because it demonstrates our commitment to the certification and overall competency of our partner ecosystem, including systems integrators, OEMs, VARs and our entire distribution channel,” said Scott Kiser, ecosystem director, Invensys Operations Management. “Invensys is also helping to drive the adoption of CSIA certification through our comprehensive ecosystem, which includes system integrators that possess the knowledge, resources and skills required to deliver world-class operations management solutions to end users, helping them achieve operations excellence.”

About CSIA

The Control System Integrators Association (CSIA) is in its second decade of helping system integrators become better business people. Members gain the power of the association’s broader presence and its insights into the best business and project management practices for the automation and IT domains. CSIA is committed to the business development of control system integration companies and their implementation of best practices in order to provide a healthy, low-risk channel for the application of technology to their industrial clients.

About Invensys Operations Management

Invensys Operations Management, a division of Invensys, is a leading provider of automation and information technology, systems, software solutions, services and consulting to the global manufacturing and infrastructure industries. Headquartered in Plano, Texas, its solutions are used by more than 40,000 clients around the world in more than 200,000 plants and facilities.

Invensys Operations Management’s offerings are delivered under several prominent industry brands, including Avantis, Eurotherm, Foxboro, IMServ, InFusion, SimSci-Esscor, Skelta, Triconex and Wonderware. The company’s approximately 9,000 employees and its global partner ecosystem integrate these products and services to help clients collaborate across systems and enterprises in real time, extracting critical data to make faster, better decisions and synchronize their operations from the plant floor to the executive offices, aligning production goals with business objectives.
